

ABSTRACT OF THE DISCLOSURE

5           Polymeric articles comprising a layer of fluoropolymer such as  
polytetrafluoroethylene bonded e.g. extruded onto a polymeric substrate derived from a  
polymeric blend comprising polyolefins, maleic anhydride-olefin copolymers,  
polyamides, thermoplastic polyurethanes, isoprene-styrene copolymers, and phenolic  
resins. The articles include fuel lines, tubes, hoses, containers, and sheet material for  
10 various uses.
